

# EPL Express

Gain the speed advantage, with low latency, high speed global connectivity.

## What is EPL Express?

Ethernet Private Line Express provides customers with low latency connectivity between international financial capitals in Asia Pacific, Europe and the Americas, all backed by industry - leading service level agreements.

If gaining an edge with every speed advantage in trading or speed to market makes a significant impact to your bottom line and performance, then it is time to consider Telstra's EPL Express service.

Of particular interest to financial organisations around the world that compete in today's fast-moving capital markets, EPL Express also has significant benefits to offer cloud-based service providers and other organisations that count on reliable, high-speed global connectivity for their mission-critical operational backbone and as the cornerstone of their business success.

## Benefits

### Reduced risk for global organisations

When the speed and performance of a global network have a pivotal impact on your revenues, you cannot afford to take unnecessary risks. Telstra, through EPL Express, helps you mitigate these risks by offering low latency, comprehensive Service Level Agreements (SLAs), and low Round Trip Delay (RTD) – a safer option for businesses operating in diverse geographies.

### Delivers sustainable business growth

Telstra is well positioned to support your needs wherever your business takes you, or whenever you are ready to expand.

EPL Express is available on key routes between the world's major financial capitals. This service is highly scalable and can handle the rapidly changing bandwidth demands characteristic of high-frequency financial trading and cloud-based services.

With our monitoring and management capabilities, we can provide visibility of your current demands and facilitate your future service planning. In addition, Telstra customers can get access to a more complete trading technology package with Global Financial Trading Solutions.

### Strong Asia Pacific presence

The Asia Pacific region is a major growth area for high-frequency algorithmic trading and also a region in which Telstra has been operating for the last 30 years. With our extensive local experience, capabilities and infrastructure, Telstra can both help you tap into new opportunities to increase your revenue and support your own expansion.

### Go 100% direct

Getting started couldn't be simpler. Telstra unlocks the door to an excellent customer experience by offering all our EPL Express customers a single point of accountability. With networks mirroring your 'live' networks on all routes across the globe, and our advanced diagnostics capabilities, Telstra has 100% direct ownership for your experience at all times. Local teams with local expertise take care of you every step along the journey.

## Features

### Low latency

- Site-to-site low latency on every circuit.
- Stringent Service Levels Agreements (SLAs).
- Enjoy peace of mind with service availability and speed governed by agreed SLAs for RTDs on every circuit.

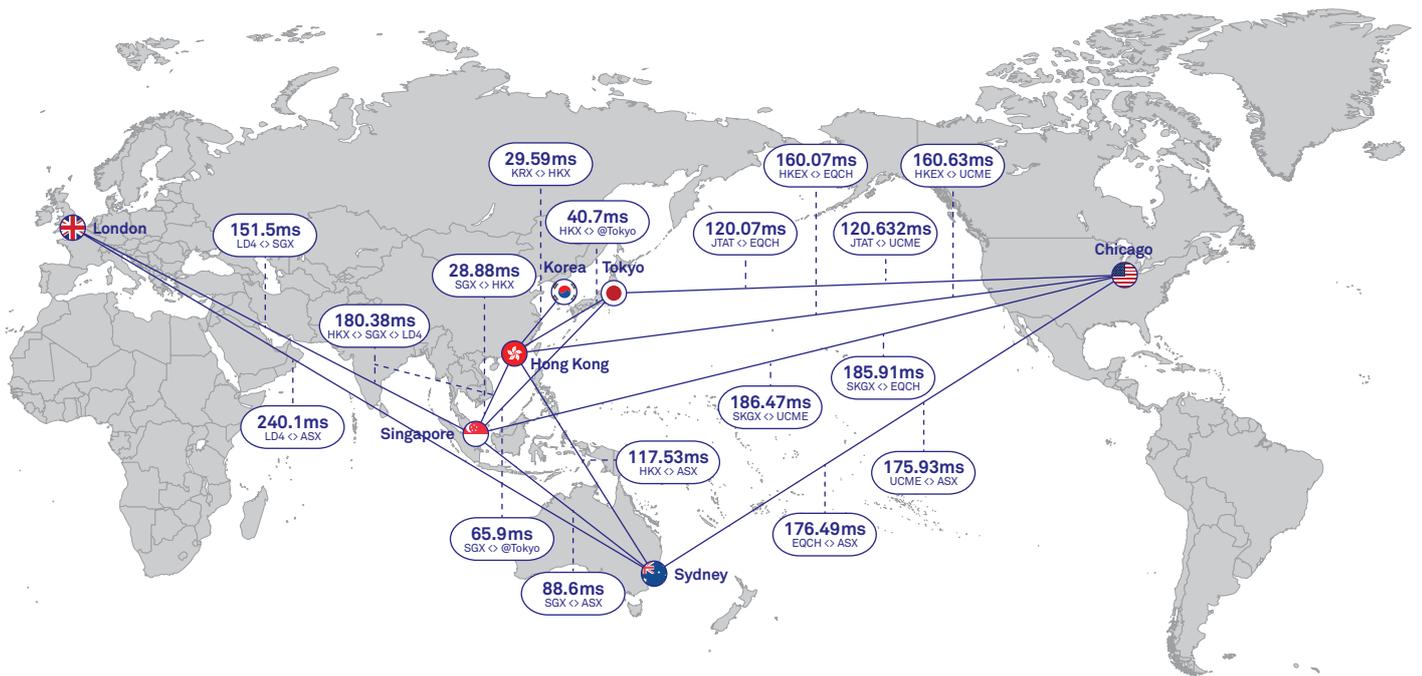

### Site-to-site management

Gain clear site-to-site network performance visibility along with diagnostics capabilities.

### Choice of bandwidth levels

Select the speed that best matches your business requirements.

## EPL Express coverage

Sending an electronic order between **Singapore** and **Hong Kong** takes **28.88 milliseconds** to complete.

A jumbo jet flying at this speed could circle the earth **twice** in one second.

Sending an electronic order between **Tokyo** and **Chicago** takes **120.07 milliseconds** to complete.

If an hour goes by this quick, the entire 80-year human lifespan will be as short as *a day*.

Sending an electronic order between **Sydney** and **London** takes **240.1 milliseconds** to complete.

With a space shuttle travelling this fast, a trip to Mars would only take **30 minutes**.
