

# Telstra's Internet Coverage

**When it is internet that you need,  
Telstra got you covered.**

- On-net pops (GID) spanning US, Asia, Europe and the Middle East providing highest quality and predictability.
- Global Internet Extension (GIE) offered through regional partnerships to provide local internet access in over 80 key countries. Ideal for SDWAN deployments balancing performance and cost.
- Extended GIE Coverage to cover 190+ countries and territories for full global reach.

For full country coverage details please see coverage matrix or speak to your account manager.
